me@jessebreneman.com | github.com/jbreneman | jessebreneman.com

## TECHNICAL EXPERTISE

Responsive web development using HTML, CSS/SCSS/LESS, Javascript (ES5, ES2015+), Vue.js/Vuex, Nuxtjs, node.js, Jest, testing-library, Cypress, front end tooling (module bundlers like Webpack, node scripts), git, some Sketch/Figma.

My focus is on building quality, accessible UIs and I tend to skew more toward the front of the front end, preferring design and CSS over heavy javascript although I am good at both. I like building design systems and converting existing codebases to reusable pieces.

## EXPERIENCE

### **Loop, Columbus, OH - Senior Front End Engineer**

OCT 2018 - Present

Responsible for developing new features and maintaining current features of the core SaaS product involving online returns. Also worked to update and relaunch a marketing website; built various SDKs for integrating client's stores directly with the product; collaborated to build a design system and component library that went on to be used on multiple products; collaborated to help build internal tooling for customer service teams.

### **Ologie, Columbus, OH - Front End Web Developer**

JAN 2018 - OCT 2018

Collaborated with other developers, designers, and project managers to develop custom themes for higher ed clients.

### **Rocket Code, Columbus, OH - UI/UX Front-End Web Developer**

OCT 2015 - JAN 2018

- Collaborated with designers and project managers to develop custom ecommerce interfaces for multiple clients on the Shopify platform.
- Responsible for multiple types of projects, including full custom theme builds, ongoing redesigns and incremental updates using A/B testing as a guide for incremental improvement.

- Built and iterated on various quality of life internal tools, mainly improving and upgrading the front end team's toolchain.

### **Freelance - Web Developer**

AUG 2013 - NOV 2015

- Miscellaneous freelance projects for small businesses looking to establish a small online presence.
- Short contract work with an agency, primarily front end development for various clients.
